PEPEROMIA

Tingdal by Lundager™

Greenex proudly represents the leading Peperomia caperata breed, Tingdal By Lundager™.

Peperomia caperata is an evergreen plant known for its compact, mounding growth habit. Native to the rainforest understory of Central and South America, this species thrives as a houseplant due to its moderate size and decorative foliage.

The leaves of *Peperomia caperata* vary in color among different cultivars, offering a range of options for collectors and enthusiasts. Its unique textured foliage and compact size make it a popular choice for enhancing indoor environments, from homes to offices. Additionally, its size and humidity contribution make it ideal for use in terrariums and dish gardens.

At Tingdal By Lundager™, we are dedicated to product development every single day. Over the past ten years, we have focused on adding exciting varieties to our Peperomia catalog. Our new varieties include Amazonas®TP1, Buenos Aires®TP7, Caracas®TP2, Cayenne®TP5, Lima®TP6, Montevideo®TP3, Santiago®TP4, Quito®, Mendoza® & Costa Rica® (protected and patented varieties).
