# POTHOS BY 'COLOURS OF SENTINEL'

Greenex proudly represents **Colours of Sentinel**.

**Sentinel** is a company that engages exclusively in the cultivation of the Scindapsus, a green houseplant originally from the tropics.

The plant is also well-known by the name of Pothos. It originated as a creeping plant, winding its path through the rain forests, up the stems and trunks of other plants and trees.

The leaves of a naturally-occurring Scindapsus can grow up to 2.5 metres (8.2ft) in width.

Available for shipment to your location as URC from our partnership with **Xclusive Uganda**.
