

## Hasfarm Young Plants earns MPS certification.

*Posted On 05 Apr 2016*

**DALAT, Vietnam: As the first young plant propagator in Vietnam and one of the very few in Asia, Hasfarm Young Plants is proud to have obtained the MPS certification.**

Hasfarm Young Plants is the young plant division of Dalat Hasfarm and is a leading propagator with exports to Europe, North America and increasingly to other Asian countries. In 2015, Hasfarm Young Plants produced over 250M cuttings and is the largest independent young plant producer in Asia. Apart from Vietnam, the Hasfarm Group has a production location in Kunming, China.

According to Torben Pedersen, “The MPS Certification shows our commitment to sustainability and our goal to better serve our customers.”

Hasfarm Young Plants will be present at the IPM in Beijing on May 11 to 13.
