SELAGINELLA MARTENSII 'FROSTY FERNS'

Selaginella martensii or "Frosty Fern" is a beautiful plant that grows with small scale-like leaves on branching stems with white edges. A popular seasonal product for Christmas time!

This beautiful plant grows with small scale-like leaves on branching stems with white edges. It thrives best in bright condition but does not tolerate direct sunshine.

Keep moist all the time, do not let it dry out and you will have pleasure of it for a very long time.
